Office Action Summary	Application No. 10/666,912	Applicant(s) HAUBRICH ET AL.	
	Examiner David Turocy	Art Unit 1762	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- Claim 3: binder type either water soluble or water dispersible polymer.
- Claims 4-5: a specific polymer.
- Claim 6: a solvent soluble or solvent dispersible polymer binder.
- Claims 7: a specific redispersable particulate.
- Claim 11: a specific solvent.
- Claims 12-14: a specific thin film material.
- If applicant elect claim 14, then 15-17: a specific conductive material.
- Claims 18-23: a specific method for depositing the thin film.
- Claims 24-31: a specific method for forming a patterned thin film structure.
- Claims 37-38: a passive matrix or an in-plane switching electrophoretic display.
- Claims 45-48: a specific type of electrode.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species in each of the preceding groups for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-2 are generic.

Art Unit: 1762

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

- Claims 52-53: a first solvent

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species in each of the preceding groups for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 50-51 are generic.

3. This application contains claims directed to the following patentably distinct species of the claimed invention:

- Claims 60-61: a method of stripping
- If applicants elect 61, then 62-63, a method of using mechanical pressure

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species in each of the preceding groups for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 58-59 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations

of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
